THIS ADDENDUM to the numbered end-user license agreement ("EULA") referenced above (the "License") becomes effective on the date stated above (the "Addendum Effective Date"), on condition that an authorized representative of the Licensee has completed the online check-out, including clicking agreement to the Addendum terms.

a) The last sentence in section 1(a) of the License is hereby deleted in connection with the uses of the Font Software permitted by this Addendum. This Addendum is effective only for the term of years named above from the Addendum Effective Date. Unless you obtain a new addendum covering a future time period, all use permitted hereunder must be discontinued by the term expiration date, subject to all of the provisions of the EULA.

b) Sections 1(b) and (c) of the License are hereby modified to additionally permit you to embed the Font Software within an unlimited number of digital application(s) associated with the licensed brand (individually or collectively, the "Applications"), only if the following conditions are met: (1) the Font Software will not be installed in the devices' system in a manner that renders it available to the user other than for use in the Applications; (2) the Applications are substantially connected to the licensed brand; and (3) the Applications prominently display the brand.

c) Section 1(f) of the License is hereby modified to permit you to subset the Font Software files embedded in the licensed Applications, on condition that you retain the Darden Studio name of the Font Software. Darden Studio is not responsible for any display or other technical problems which may occur as a result of your use of third-party software for this permitted modification. You are not permitted to otherwise modify the font software without Darden Studio's express permission. By way of illustration and not limitation, font file name obfuscation and the swapping of default characters are both expressly forbidden.

d) The Addendum fee is based upon the average monthly combined active users (measured over a one-year period) for all of your Applications that embed the Font Software (a user of multiple Applications is counted for each one), up to the maximum stated. (If a user can access the same interface through both a website and an application, your use may be better suited for a hybrid web/app addendum.) The price stated above represents the prepaid amount. For each year, if actual use exceeds the prepaid amount you will be charged the difference between the prepaid amount and the actual use based on the tier-based pricing in effect at the time of purchase. (For a multi-year Addendum, you will be asked to report actual use at the close of each year and pay any difference between the prepaid and the actual use price, with no penalty.) The price of a new addendum will be based upon Darden Studio's pricing tables then in effect.
